You betcha! If I was going to play an unknown tape, I would try a consumer
stereo machine first because I would stand the best chance of getting useful
stuff off that way.

Groups;

Picked up a black box (really) with top handle and sliding cover over front
panel.

On top of the box there is a tag that reads

BC 1-201A
G&M EQUIP, CO
N.HOLLYWOOD CAL

There is a drawing on the inside of the front cover, where it's marked I-201

Whats this go to ???

tnx

John n9hrt

Does anyone here want 10 to 12 old CB radios that I got from a closed TV repair shop?

There are no manuals and some of them have been opened and repairs attempted. I would assume that none of these radios work so you can have 'em for the price of shipping from Reno, NV 89506. I'd guess 30 to 40 pounds.

Does anyone have or know where a manual for a Sierra model 108A frequency selective voltmeter might be located. I recently acquired one in nice shape and have the manual for the Sierra 128AY but they are very different. Any help would be greatly appreciated.

Thanks,

Tom N5AMA

I'm having trouble locating a particular transmitter construction article in my library.

As I recall it was a 50s vintage crystal controlled single tube oscillator with the tube on it's side and pointing away from the operator. Mechanically it required a couple of angle brackets, a couple of pieces of stiff wire and 1/4" lathe. The article included quite detailed construction info for the novice. I believe this was an ARRL project but I can't find it in my handbooks.

Can someone point me to the publication and the date?

tnx es 73,
Niel - W0VLZ

Hello, Neil

That sounds like the 6AG7 80m transmitter in May 1951 QST,
also featured in the 1953 Handbook.

73,
Ed Knobloch

Niel -

I think you're referring to the "Novice One-Tuber", a two part article
in QST for May and June, 1951, by Don Mix, W1TS. It is also described
in the 1952 and 1953 Handbooks.

Hi:

RE: which VOM to put on the bench. I confess to having a soft spot for test equipment. I have a Simpson 261, Eico VTVM, RCA VTVM, HP 410C and 427A, Fluke 8810A and 77, military ME something or other. Probably more stuck somewhere. Out of all these, I use the two Flukes the most. Always work, always on cal, the autorange puts them on the right range.

Richard

Group,

I think Boris wants to buy an HRO-5T. Is there anyone who might want to contact him? If so, please contact him direct at drobor@vyborg.ru I don't have one to sell him.

thanks, & 73, John Dilks, K2TQN

Folks,

A Hunter Bandit 1000A amplifier recently followed me home. I need to =
locate a manual, or copy of same, for this little beast.

I have contacted all the usual manual supply places to no avail.

I even contacted the gentleman who owns the one Joe Veras photographed =

in his CQ Classics Calendar a few years ago and he doesn't have a = manual.

The unit uses a pair of 572Bs and is housed in a cabinet about the size = of a Collins 312B-3 speaker. The power supply is remote in a similar = sized cabinet.

Anyone out there have one of this little gems and its manual?

73,

AL, K0AL
